IT exam study guide / simulations

Exam : HP0-922

Title : Implementing and Supporting HP Storage Essentials v5.1

Vendors : HP

Version : DEMO

NO.1 Which component ensures HP Systems Insight Manager/Storage Essentials synchronization?

- A.CIMOM
- B.connector
- C.SMI-S interface
- D.dedicated transaction manager

Correct:B

NO.2 Which services can be used by managed devices to send alerts to the management server?

(Select three.)

- A.Ping
- B.FTP
- C.SMI-S
- D.SMTP
- E.SNMP
- F.WBEM/DMI

Correct:C E F

NO.3 Which HP Storage Essentials features include direct attached storage? (Select two.)

- A.schedule of provisioning tasks
- B.display of ports in Performance Monitor
- C.display of connections in System Manager
- D.schedule of port performance data collection
- E.display of reachable ports in Path Provisioning

Correct:A C

NO.4 Which security feature protects the intercommunication of HP Systems Insight Manager (SIM),

its clients, and its users?

- A.Secure Shell based scripting is limited to UNIX platforms.
- B.HP-signed Secure Socket Layer certificates ensure authenticity.
- C.Secure Task Execution limits access from specific HP SIM servers.
- D.Secure Shell known_hosts files contain a list of discovered servers.

Correct:C

NO.5 Which databases can be used by HP Systems Insight Manager? (Select two.)

- A.DB2

- B.Oracle
 - C.Sybase
 - D.PostgreSQL
 - E.Microsoft SQL
- Correct:B E

NO.6 Which infrastructure service is required on the central management server host to install

Storage Essentials?

- A.CIM
- B.SNMP
- C.CIMOM
- D.SMI-S provider

Correct:B

NO.7 Which statement about Storage Essentials Solution Service is correct?

- A.The product warranty is extended with Level 3.
- B.At least one level must be included in each quote.
- C.Storage Essentials is customer installable and all levels are optional.
- D.Software installation, configuration and testing are only included in Level 1.

Correct:B

NO.8 The security architecture of HP Systems Insight Manager (SIM) is designed to protect data and

software functions from unauthorized access. What is a key feature of SIM security?

- A.built-in accounts
- B.preconfigured trusts
- C.role based associations
- D.proprietary transport protocols

Correct:C

NO.9 What is a recommended prerequisite for a hardware or software product to become HP Storage

Essentials compliant?

- A.Fibre Channel support
- B.Windows 2000 or 2003 server platform
- C.HP Systems Insight Manager compatibility
- D.Storage Network Industry Association conformance

Correct:D

NO.10 Where will you find the HBA Test Utility?

- A.distributed with CIM extensions CD
- B.as an HP Storage Essentials CLI command
- C.in the Tools menus of HP Storage Essentials
- D.in the tools menu of HP Systems Insight Manager

Correct:A

NO.11 What are steps of the HP Storage Essentials discovery process? (Select three.)

- A.Detail Scan: Scan for SAN topology, backup topology, and all available volumes.
- B.Unlock: At the end of the discovery, data flow in the storage network is re-enabled.
- C.Setup: Before the initial scan starts, an IP address or an IP address range must be specified.
- D.Topology Scan: On the second scan after initial scan, a tree shows all dependencies between devices.
- E.Hardware Scan: After the detail scan completes, a hardware scan identifies all available resources.
- F.License Scan: After the hardware scan completes, a scan identifies all licensed and unlicensed server applications.

Correct:A C D

NO.12 Which Storage Essentials plug-in can be used to monitor a supported backup solution?

- A.dbAdmin utility
- B.Backup Manager
- C.RMAN backup manager
- D.Storage Essentials backup utility

Correct:B

NO.13 What is a provisioning method available in HP Storage Essentials v5.x?

- A.single-action, single-element - occurs in real time and cannot be scheduled
- B.SAN based - shows which hosts have allocated storage in a SAN and can be scheduled
- C.multi-action, host based - shows all current pools allocated by hosts and cannot be scheduled
- D.storage based - shows how many hosts have allocated capacity on a storage system and can be

scheduled

Correct:A

NO.14 What is a characteristic of HP Systems Insight Manager with regard to open system management platform design?

A.It may be extended by using third party plug-ins.

B.It is licensed for exclusive use with HP components.

C.It supports only HP platforms, whereas any platform integrates with HP OpenView.

D.It primarily uses SNMP to contact devices; other connection methods are optional and must be purchased.

Correct:A

NO.15 What extends HP Systems Insight Manager with additional SAN management and monitoring functionality?

A.entering a new license key

B.installation of SMI-S providers

C.the CIM extension on managed hosts

D.a CIMOM client enabled on the storage system

Correct:B

NO.16 What are optional HP Storage Essentials plug-ins? (Select three.)

A.Policy Viewer

B.Oracle Viewer

C.Sybase Viewer

D.Chargeback Manager

E.Performance Manager

F.Global Database Viewer

Correct:B C D

NO.17 Which service must be stopped to allow the Database Admin utility to work?

A.CIMService

B.OraService

C.CIMManager

D.AppStorManager

Correct:D

NO.18 HP Systems Insight Manager and HP Storage Essentials provide server and storage management through a central management platform. Which functions are included? (Select three.)

- A.integrated security
- B.storage array configuration
- C.array discovery and identification
- D.access to storage on unmanaged hosts
- E.assignment of a new management server
- F.speed modification on Fibre Channel connections

Correct:A B C

NO.19 What are the two components of the connector?

- A.SE Database connector which connects both HP SIM and HP Storage Essentials to the database
- B.ODBC connector which connects HP SIM to HP Storage Essentials; HP SIM connector which connects HP Storage Essentials to HP SIM
- C.MySQL connector which connects HP SIM to HP Storage Essentials; HP SIM connector which connects HP Storage Essentials to HP SIM
- D.Storage Essentials connector which connects HP SIM to HP Storage Essentials; HP SIM connector which connects HP Storage Essentials to HP SIM

Correct:D

NO.20 Which activities can be monitored with Storage Essentials? (Select two.)

- A.storage growth planning
- B.disaster recovery planning
- C.storage network traffic sniffing
- D.domain user rights identification
- E.underutilized storage identification

Correct:A E
